

## **07\_OpenMRS\_Asset\_Inventory**

### **Task:**

List five assets in your OpenMRS cloud and local environments:

### **Mini Project - OpenMRS Assets:**

1. OpenMRS Cloud Server (Ubuntu VM).
2. OpenMRS MySQL database.
3. Patient data (in the DB, plus backups on S3).
4. OpenMRS application software (version X).
5. Admin portal laptops.
6. Clinic workstations.
7. Nurses tablets/devices.
8. AWS EC2 instances
9. AWS Web application firewall (WAF).
10. AWS Virtual networks, subnets, security groups/NSGs, route tables, VPNs/direct connect/peering.
11. AWS application load balancers.
12. AWS API Gateway.
13. Web ACLs.

14. AWS Shield.
15. Block storage volumes/disks, file shares, ephemeral storage.
16. Administrative accounts and privileged users.
17. Training materials, onboarding documents, and institutional knowledge.
18. Architecture diagrams, data flow maps, SBOMs.
19. Policy documents (access control, backup/restore, incident response, privacy).
20. Compliance evidence and audit logs.
21. Shared kiosk machines.
22. Barcode scanners, label printers, card readers, and connected peripherals.
23. Third-party SaaS tools used for analytics, reporting, or messaging.
24. Data loss prevention (DLP) policies, email security if relevant to workflows.
25. IAM users, roles, groups, policies, and SSO/OIDC/SAML apps.
