System Mission & Purpose (Task P-8)

Task:

Draft a one-line mission or business purpose for OpenMRS. Aim for a single sentence that captures the core goal. For example, you might write "OpenMRS exists to provide doctors and nurses in low-resource settings with an easy-to-use electronic medical records system, improving patient care and record-keeping." It doesn't need to be perfect prose – just get the main idea down. This is your north star for OpenMRS.

Mini Project – OpenMRS' Mission Statement:

The purpose of OpenMRS is to empower healthcare providers, especially in low-resource settings, with an open, flexible, and reliable electronic medical record platform that improves patient care, data quality, and health outcomes.
